

WATER TREATMENT OPERATOR 4

JOB SUMMARY

Under the direction of system management personnel, the Water Treatment Operator 4 is primarily responsible for the day to day operation and maintenance of all water production, treatment, storage and recharge facilities and the training and field supervision of employees assigned to work in these facilities.

JOB DUTIES AND ESSENTIAL FUNCTIONS

Performs a variety of tasks and duties, which may include, but are not limited to, the following:

- Assist system management personnel with scheduling maintenance and repairs and coordinating work schedules of other employees assigned to water production and treatment.
- Provide on-site training and supervision to all employees assigned to water production and treatment.
- Supervise the day-to-day operation and maintenance of production, treatment, storage and recharge facilities as applicable.
- Train Water Treatment Operators to troubleshoot and perform repairs to pumping equipment, controls and water treatment equipment.
- Must be available to respond to water production and treatment emergencies.
- Perform duties of Water Treatment Operator 1, 2 and 3 and Serviceman or Servicewoman as needed.
- Perform other duties as assigned by supervisor.
-

SKILLS, KNOWLEDGE AND PHYSICAL REQUIREMENTS

Skills, knowledge and physical requirements include, but are not limited to:

- Knowledge of, and training on, all types of water production and treatment facilities, with an emphasis on arsenic and nitrate removal facilities.
- Knowledge of safety requirements related to electrical equipment, water treatment chemicals, chemical feed pumps, hazardous materials, and all types of waste related to water production and treatment.
- Ability to use Supervisory Control and Data Acquisition (SCADA) equipment; personal computers, water quality field test kits, pressure gauges, transducers, calibration equipment, Company vehicles, hand tools, welders, backhoes, air compressors and other equipment necessary in the operation and maintenance of a water distribution and water treatment system.
- Knowledge of and compliance with Arizona Department of Environmental Quality ("ADEQ") standards and procedures.
- Must have good communication skills.
- Ability to work effectively in a team environment with other company employees.
- Ability to train other employees assigned to water production and treatment.
- Must present a positive image of the Company and be successful in promoting a team effort among all employees engaged in water production and treatment.
- Ability to physically perform work that requires walking, bending, kneeling, digging, lifting and climbing.

- Ability to lift 100 lbs. to waist level and maneuver equipment and implements weighing in excess of 150 lbs.
- Must be able to work outside in all types of weather.
- Must be able to comply with all personal protective equipment (PPE) related to the position.

EDUCATION, TRAINING, AND EXPERIENCE

The following are required:

- High school diploma or equivalent GED.
- Successful demonstration of the required skill level related to water production and treatment facilities as determined by system management personnel.
- Three years experience performing the duties of a Water Treatment Operator 3 or similar experience.
- Valid Arizona driver's license and acceptable driving record.
- Valid ADEQ Grade 3 or higher Water Distribution Operator Certification and valid ADEQ Grade 4 Water Treatment Operator Certification.
